TO APPLY TO THIS PROJECT CALL, YOUR UNIVERSITY’S AUTHORIZED ORGANIZATIONAL REPRESENTATIVE WILL NEED TO CREATE AN ACCOUNT AND SUBMIT WHITE PAPER/PROTOTYPE PROPOSAL DOCUMENTS THROUGH THE UNIVERSITY CONSORTIUM FOR APPLIED HYPERSONICS WEBSITE: HTTPS://HYPERSONICS.TAMU.EDU.

WHITE PAPERS/PROTOTYPE PROPOSALS WILL BE RECEIVED UNTIL THE ABOVE DEADLINE. IF YOU ENCOUNTER ANY ISSUES OR CONCERNS WITH YOUR SUBMISSION, PLEASE EMAIL: UCAH@TAMU.EDU. QUESTIONS REGARDING THE CONTENT OF THE REQUEST FOR WHITE PAPER/REQUEST FOR PROTOTYPE PROPOSALS MUST BE POSTED THROUGH THE UNIVERSITY CONSORTIUM FOR APPLIED HYPERSONICS WEBSITE ABOVE.

1. PROJECT OVERVIEW

**Funding Opportunity Title:** University Consortium for Applied Hypersonics (UCAH) Project Call (TEES/JHTO-RPP-2022-001).

**Dates:** Questions regarding the Request for White Paper (RWP) may be emailed to UCAH@tamu.edu by April 20th, 2022, at 5:00 PM (CST). Responses to the questions will be posted on the UCAH website (https://hypersonics.tamu.edu). Questions and responses to questions regarding White Papers (WPs) will be made available to all proposers.

**Notice of Intent:** Notice of Intent to submit a WP must be provided by 5:00 PM (CST) on May 4th, 2022. Please provide the Topic Number and full list of participants (name and institution) through the project call webpage on the UCAH website.

**Phase 1:** Project WP submissions must be submitted through the UCAH website proposal call link and must be received no later than May 11, 2022, at 5:00 PM (CST). Submissions received after the deadline will not be considered. The Government is interested in receiving top applied research proposals; hence WP submissions are limited to one per topic, per university, and a maximum of seven Principal Investigators (PI) are authorized per proposal.

**Phase 2:** WPs will be evaluated and a Request for Prototype Proposal (RPP) may be issued to those, which best meet the intent of the Office of the Under Secretary of Defense (OUSD), Research and Engineering (R&E) Joint Hypersonics Transition Office (JHTO), per Section 3.3 of this document. PIs whose WPs were not selected for continuation to the Prototype Project Proposal (PPP) phase will be notified. PPP submissions must be submitted through the UCAH website proposal call link and must be received no later than August 29, 2022, at 5:00 PM (CST). Submissions received after the deadline will not be considered. Questions regarding the RPP may be emailed to UCAH@tamu.edu by August 15, 2022 at 5:00 PM (CST). Responses to the questions will be posted on the UCAH website (https://hypersonics.tamu.edu). Questions and responses to questions regarding the RPP will be made available to all proposers, unless they involve proprietary or controlled unclassified information (CUI) material.

**Submission Instructions:** Proposal submission will be conducted utilizing the UCAH website. After creating an initial account (see https://hypersonics.tamu.edu), proposal teams can upload proposal documents. You should verify that the person authorized to submit proposals for your organization has completed registration well in advance of the submission deadline. To apply for grants on behalf of your organization, you will need the Authorized Organizational Representative role. Proposal submissions cannot be accomplished before your organization is fully registered. The portal is the single point for submission.

**Funding Opportunity Description:** The JHTO, in partnership with Texas A&M Engineering Experiment Station (TEES) and the UCAH, is soliciting competitive WPs/PPPs supporting hypersonic research and technology, per the defined Statement of Need (SON) in Section 2.1. JHTO reserves the right to fund none, some, or all of the submissions made in response to this RWP/RPP. Furthermore, JHTO may choose to

---

1 This does not preclude teaming between faculty members from different Universities, as long as no University submits more than two (2) WPs on which it is the lead.
fund a portion of a submission or a combination of submissions. Not all meritorious submissions will necessarily receive funding. TEES and JHTO will exercise their discretion in selecting submissions. TEES and the JHTO will provide no funding for direct reimbursement of WP/PPP development costs.

**Estimated Project Ceiling:** Up to a three-year period of performance at $1,500,000 per year per Project Sub-Agreement (PSA). The JHTO reserves the right to approve projects that slightly exceed this level based on the technical strengths of the proposal and the reasonableness of the costs.

**Applicant Eligibility:** Applicant and any sub-institutions must be a university or affiliated UCAH Consortium Member by the time of proposal submission on **August 29, 2022**.

**Non-Traditional Defense Contractor (NTDC) Participation:**

a. Agreement awards are made under 10 U.S.C. § 4003(d)(1) (previously 10 U.S.C. § 2371b), and as such all awardees must meet at least one of the following conditions:

i. There is at least one NTDC or nonprofit research institution participating to a significant extent in the prototype project.

ii. All significant participants in the transaction other than the Federal Government are small business (including small business participating in a program described under section 9 of the Small Business Act (15 U.S.C. 638) or NTDCs.

iii. At least one-third of the total cost of the Prototype Project is to be paid out of funds provided by sources other than the Federal Government.

iv. The senior procurement executive for the Agency determines, in writing, that exceptional circumstances justify the use of a transaction that provides for innovative business arrangements or structures that would not be feasible or appropriate under a contract, or would provide an opportunity to expand the defense supply base in a manner that would not be practical or feasible under a contract.

b. A NTDC is an entity that is not currently performing and has not performed, for at least one year preceding the issuance of a RPP, any contract or subcontract for the Department of Defense (DoD) that is subject to full coverage under the Federal Acquisition Regulation (FAR) based Cost Accounting Standards (“CAS”). A subsidiary or a division of a traditional defense contractor may still qualify as an NTDC.

c. Significant participation is determined on a project basis and is based on the importance of the NTDC contribution to the overall execution or outcome of the proposed project. Other Transaction (OT) Authority statute does not prescribe a monetary threshold or percentage value to justify significance. Examples of “significant” participation are:

i. Supplying a new key technology or product, or unique capability;

ii. Causing a material and quantifiable reduction in the project cost or schedule;

iii. Causing a measurable increase in the performance of the prototype;

iv. Accomplishing a significant amount of the effort;

v. Value-added analysis not based on percentage of project work or value.

d. Since contracts and subcontracts with small businesses are exempt from full CAS coverage, small
businesses are deemed NTDCs under OT Authority. An entity is considered a small business based upon its applicable North American Industry Classification System (“NAICS”) designation (as described at 13 C.F.R. §121.201) for the specific nature of the work being proposed.

Except as addressed in the next paragraph, individuals supported by a Sub-Agreement awarded as a result of this RWP/RPP process must be United States (U.S.) citizens prior to award. Since research projects are expected to include CUI, International Traffic in Arms Regulations (ITAR) or Distribution Statement C information, the fundamental research exclusion (National Security Decision Directive 189) is not expected to apply. Universities responding to this RWP/RPP must be able to appropriately maintain and handle sensitive data. Hence, all publications will require review and approval.

Affiliate Consortium Members, including Industry, University Affiliated Research Centers (UARCs), a University Affiliated Laboratory (UAL), and Federally Funded Research and Development Centers (FFRDCs), and universities (on a case by case basis) from Australia, Canada, New Zealand, and the United Kingdom are not eligible to respond to this RWP/RPP but may team with an eligible principal -proposer and be funded accordingly. Consortium members and affiliate consortium members -- including FFRDCs, government labs, and military universities -- are responsible for determining the extent to which their participation in WP/PPP submissions is appropriate and consistent with their entities’ authorities and applicable laws, regulations, and policies.

Teams are encouraged in all areas, to include:

- Other universities;
- Industry;
- UARCs/FFRDCs;
- National Laboratories;
- Minority Serving Institutions;
- Nontraditional Members.

**Period of Performance:** Three-year with an anticipated start date no later than June 1, 2023.

**Administrative and Evaluation Support:** All submissions will be treated as “source selection information” as defined by 41 U.S.C. § 2101(7), and contents will be disclosed only in accordance with 41 U.S.C. § 2102. During the evaluation process submissions may be handled by government support contractors, TEES personnel, and other Consortium members for both administrative purposes and to support technical evaluations. Consortium members that are proposing under this RWP/RPP, will not be reviewers within the topic area that they proposed in. All persons performing these roles are expressly prohibited from performing sponsored technical research and are bound by appropriate nondisclosure agreements (NDAs).

**2. PROJECT TOPIC DESCRIPTIONS**

Section 2.1 identifies SON for each Prototype Project and the submission process will begin with the RWP. WPs shall follow the format described in Section 3.2. Selections of WPs will follow the basis of selection summarized in Section 3.3. UCAH members are responsible for all expenses associated with responding to the RWP.
2.1 Proposal Project Calls
JHTO in partnership with the UCAH are interested in receiving WPs and PPPs for the following areas:

2.1.1 Challenge Projects

Topic 1: Hypersonic Systems Cooperative Engagement and Teaming

Technology Disciplines: Navigation, Guidance, Control and Sensing (NGC&S); and Systems Engineering and Analysis (SEDA)

Proposal Description: Future hypersonic systems may provide improved strike effectiveness against moving and relocatable targets and better defense against hypersonic threats through cooperative engagement and teaming. Projects that design and demonstrate technologies that enable multiple hypersonic and conventional vehicles to operate, communicate, and collaborate in challenged environments to increase battlefield effectiveness are sought in this proposal. Decentralized control algorithms and robust communication architectures are required to allow a system of hypersonic strike vehicles to collaboratively engage a set of targets. The desired outcome is a set of intelligent, mission-aware systems that can complete missions despite complications such as loss of communication, attrition, adversarial engagement, and dynamic or changing target sets.

Technical Solicitation: Proposals are sought to develop concepts of operation, system of system requirements, communication architectures, and trusted autonomous guidance and control algorithms to enable collaboration across one or more families of hypersonic or traditional systems in tactically relevant scenarios. This may include topics such as real-time trajectory generation and integration with multi-agent reinforcement learning algorithms, distributed communication networks for multiple hypersonic vehicles, extreme environment sensors and apertures for small hypersonic vehicles, and high-fidelity multi-vehicle simulations in formation and the resulting impact on range.

Aspects of the Proposal: Proposals should outline the path to develop simulation environments anchored in physically realizable capabilities to assess variables such as platform sequencing for sufficient time for response and re-targeting, control limits of hypersonic platforms, sensor limitations, communication constraints, etc. Both strike and defensive missions should be considered. As a potential objective for the project, proposals should consider an integrated demonstration of the system in a simulation framework to compare effectiveness against non-networked alternatives. The objective is to clearly define operational and technical requirements to enable this capability, and also identify software and hardware to meet those requirements.

Topic 2: Characterization, Modeling and Validation of Complex Jet Interactions and Dual Aerodynamic Control

Technology Disciplines: Applied Aerodynamics (AERO); Navigation, Guidance, Control and Sensing (NGC&S)

Proposal Description: The unsteadiness and complex physics of divert and attitude control systems requires comprehensive evaluation for future systems. Boundary layer interactions, three-dimensional shock structures and shock-shock interactions, induced separation, and interactions with aft features (cones, flares, control surfaces) can dampen or amplify the forces on the vehicle, and the control system must be equipped to maintain stability and precise control throughout these dynamic processes. Advancements in throttleable actuators provide tunable interaction mechanisms, but this variability will ultimately require additional characterization for a given flight condition as well.

Technical Solicitation: Proposals are sought to experimentally characterize and validate flow simulations using a series of vehicle geometries, jet locations, jet velocities, and operational conditions (altitude, Mach).
Proposals should encompass necessary improvements to predictive fluid models suitable for design along with the validation of these tools against experimental data on relevant geometries.

**Aspects of the Proposal:** The proposed effort should outline the coupled modeling and experimental campaign required to quantify and validate the jet interactions over the large matrix of test conditions and vehicle configurations. Models and experimental validation efforts should be interoperable with prior work to the extent possible, though both current and new performers are encouraged to apply. A rigorous and repeatable test methodology and framework should be established to provide consistency across each of the configurations under evaluation. The product of this effort should include a standardized database of all available validation data and documented modeling practices for implementation across future DoD endeavors.

**3. PHASE 1: WHITE PAPER SUBMISSION AND EVALUATION**

**3.1 General Requirements**

WPs should adhere to the following:
- Section I of the WP should be no more than four pages in length.
- Figures and tables must be numbered and, when referenced in the text, be referenced by that number. They should be of a size that is easily readable and may be in landscape orientation. They must be formatted to print on an 8.5 x 11-inch paper size.
- WPs will be single-spaced with one-inch margins on all sides. Font should be Times New Roman font (11-point minimum). Smaller font may be used in figures and tables, but must be legible.
- WPs must be in portrait orientation except for figures, graphs, images and pictures.
- The WP documents should be submitted as one pdf document. Number pages sequentially within the proposal showing proposal section and page number.
- All major sections shall begin on a new page.
- Proposal language shall be English.
- No classified information shall be submitted with the proposal.
- All information that is considered to be a trade secret or proprietary information should be marked as such. Note that government support contractors, TEES personnel, and other Consortium members may have access to this information for the purposes of administrative and evaluation support. These personnel will be required to complete a NDA and to certify that they have no conflict of interest that might impact the process. Consortium members that are proposing under this RWP/RPP, will not be reviewers within the topic area that they proposed in.

**3.2 Format**

Please use the WP templates provided on the UCAH website. WPs should be formatted as follows:

**Cover Page.** The Cover page should include:
- Project Title
- Technical Area and Topic Number (from Section 2)
- Applicant Organization
- Primary Technical Point of Contact (POC), including name, address, phone and email contact information
• Co-PI(s) names and institutions
• Primary Business POC, including name, address, phone and email contact information
• Total Solution Rough Order of Magnitude (ROM) price
• Date of Submission

Table of Contents. The Table of Contents should include all of the documents requested in Sections I-VIII.

Section I: Technical Requirements (4 pages maximum)
  a. Background and Benefits of Proposed Solution as related to the SON
  b. Technical Approach, including clearly defined prototype solution

Section II: Bibliography and References Cited

Section III: Facilities (2 pages maximum)
Identify any facilities required for the proposed research and whether those facilities are organic to project participants’ organizations or must be leased or purchased. Note whether facility availability is likely to impact project cost/schedule/performance.

Section IV: Key Personnel (2 page maximum)
  a. Include a description of contributions and significance of each

Section V: Security Requirements
  a. Address any special security and classification requirements, as necessary.
  b. Is your institution as well as those you are collaborating with capable of protecting CUI in accordance with the following Defense Federal Acquisition Regulation Supplement (DFARS) clauses?:
    ▪ DFARS 252.204-7012? YES or NO
    ▪ DFARS 252.204-7019? YES or NO
    ▪ DFARS 252.204-7020? YES or NO
    ▪ DFARS 252.204-7021? YES or NO
  c. Are they able to handle classified research? YES or NO
  b. Are they registered with the Directorate of Defense Trade Controls (DDTC)? YES or NO

Section VI: Pricing
The JHTO, as the final decision-authority in making WP selections, will consider affordability. Therefore, each WP shall include an estimated price required to meet the technical solutions described in the WP. Please use the below structure for your cost estimates. Additional budget support documentation will not be considered in the review of the white paper.
3.3 Basis for Selection

WPs will be evaluated against the stated criteria below:

1) Relevance of the proposed solution in addressing the SON.
2) Technical merit and feasibility of the proposed solution to address the SON.
3) Proposed solution’s approach and/or underlying technology is unique, underutilized and/or innovative; and the approach and/or technology is a compelling solution to the SON.

WPs will be evaluated on the basis of the merit of the proposed concept in addressing each SON, not against other WPs submitted in response to the same SON. Additionally, as an overarching matter, the Government’s evaluation will consider whether the proposal increases the likelihood of accomplishing the aspects of JHTO’s mission.

This UCAH routinely receives more WPs than it has the resources to award. Accordingly, only a select few will be invited to submit a PPP. A proposed solution may be evaluated to be of merit, but not requested to submit a PPP. The government reserves the right to limit the number of RPPs. The government also reserves the right to select a portion of a WP or a proposed combination of WPs as the basis for requesting a PPP. As WPs that are chosen to submit a PPP will be notified in writing as soon as practicable.

If the WP is of interest, but not requested to submit a PPP due to availability of government resources, the WP lead may be contacted within 180 calendar days from the WP submission date with a RPP for the possibility of a PSA award. If after 180 calendar days from the WP submission date (or earlier if notified by JHTO), government resources are not identified to formally move to Phase 2, requesting a PPP, the WP lead will no longer be eligible for an award under this RWP/RPP.

4. PHASE 2: PROTOTYPE PROJECT PROPOSAL SUBMISSION AND EVALUATION

Phase 2 of the award process, PPP submission and evaluation, will follow the evaluation process for Phase 1 as discussed in Section 3. The intent of the PPP is to provide increased, contract-level fidelity to information provided in the previously-submitted WP.
JHTO will issue a RPP through TEES. TEES will assign a program specialist to assist each member with the proposal process and ensure that the required documents are completed properly. PPPs shall follow the format described in Section 4.1 and 4.2 and will be evaluated by JHTO based on the criteria in Section 4.3. UCAH Consortium members are responsible for all expenses associated with responding to the RPPs.

4.1 General Requirements

PPPs should adhere to the following:

- Figures and tables must be numbered and, when referenced in the text, be referenced by that number. They should be of a size that is easily readable and may be in landscape orientation. They must be formatted to print on an 8.5 x 11-inch paper size.
- PPPs will be single-spaced with one-inch margins on all sides. Font should be Times New Roman (11-point minimum). Smaller font may be used in figures and tables, but must be legible.
- PPPs must be in portrait orientation except for figures, graphs, images and pictures.
- The proposal documents should be submitted as one pdf document. Number pages sequentially within the proposal showing proposal section and page number. The budget spreadsheets should also be submitted as an excel document with formulas left available for evaluation purposes.
- All major sections shall begin on a new page.
- Proposal language shall be English.
- No classified information shall be submitted with the proposal.
- All information that is considered CUI (formerly FOUO), should be marked as such and transmitted appropriately.
- All information that is considered to be a trade secret or proprietary information should be marked as such. Note that government support contractors, TEES personnel, and other Consortium members may have access to this information for the purposes of administrative and evaluation support. Consortium members that are proposing under this RWP/RPP, will not be reviewers within the topic area that they proposed in. These personnel will be required to complete an NDA and to certify that they have no conflict of interest that might impact the process.
- Letters of support are encouraged. They can be attached as an appendix to the proposal submission.

4.2 Format

Please use the proposal templates provided on the UCAH website. PPPs should be formatted as follows:

**Cover Page.** The Cover page should include:

- Prototype Project Title
- Technical Area and Topic Number (from Section 2)
- Applicant Organization
- Primary Technical POC, including name, address, phone and email contact information
- Co-PI(s) names and institutions
- Primary Business POC, including name, address, phone and email contact information
- Facility Clearance Level (if required)
- Proposed Period of Performance
- Date of Submission
• Proposed Validity Date (must be valid for a minimum of ninety (90) days)

Table of Contents. The Table of Contents should include all of the documents requested in Sections I-X.

Section I: Statement of Work (12 pages maximum).
   a. Abstract
   b. Objectives Statement
   c. Research Narrative
      i. Background and Benefits of Proposed Solution as related to the SON
      ii. Technical approach, including clearly defined prototype solution
      iii. Schedule and Deliverables
   d. Place of Performance
   e. Government Furnished Property / Equipment / Materials / High Performance Computing Requirements

Section II: Bibliography and References Cited

Section III: Facilities
Identify any facilities required for the proposed research and whether those facilities are organic to project participants’ organizations or must be leased or purchased. Note whether facility availability is likely to impact project cost/schedule/performance.

Section IV: Key Participants
Use of 10 U.S.C. § 4003 prototype authority for this Prototype Project requires that proposals meet requirements for significant participation by a non-profit research institution, NTDC, or small business.

Include a description of contributions and significance of each such entity and indicate the percentage of their total available time each will devote to this project.

<table>
<thead>
<tr>
<th>Participant</th>
<th>Business Status (Check one)</th>
<th>Participant Contribution and Significance to Overall Project</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>☐ Traditional</td>
<td>Insert detailed, quantifiable description which addresses the following:</td>
</tr>
<tr>
<td></td>
<td>☐ NTDC</td>
<td>• What is this Participant’s significant contribution?</td>
</tr>
<tr>
<td></td>
<td>☐ Nonprofit research</td>
<td>• Why is this Participant’s contribution significant to the overall project?</td>
</tr>
<tr>

<td>☐ Small business</td>
<td>(Note: number of years of experience is not deemed a unique qualification.)</td>
</tr>
</tbody>
</table>

Each participant resume shall be no more than two (2) pages in length. Current and pending sponsored
research projects are requested for each PI.

Section V: Security Requirements

a. Address any special security and classification requirements, as necessary.

b. Is your institution as well as those you are collaborating with capable of protecting CUI in accordance with following Defense Federal Acquisition Regulation Supplement (DFARS) clauses?:
   - DFARS 252.204-7012? YES or NO
   - DFARS 252.204-7019? YES or NO
   - DFARS 252.204-7020? YES or NO
   - DFARS 252.204-7021? YES or NO

c. Are they able to handle classified research? YES or NO

d. Are they registered with the Directorate of Defense Trade Controls (DDTC)? YES or NO

Section VI: Pricing

The Price Section shall provide sufficient detail to substantiate that the overall proposed price is realistic, reasonable, complete for the work proposed, and reflects the best price for the PPP. The Pricing Section shall also include a narrative explanation of proposed prices. For all team members that do not have Government-approved rates, their proposed rates shall represent the most favored customer rates.

a. Labor Rates: Provide the basis for which the estimated total labor hours were calculated, including generic labor categories, estimated rates and hours for those individuals.

b. Fringe Benefits: The proposal should show the rates and calculation of the costs.

c. Travel: The proposed travel cost should include the following for each trip: the purpose of the trip, origin and destination if known, approximate duration, the number of travelers, and the estimated cost per trip (including mileage, parking, baggage costs, etc.) must be justified based on the organizations historical average cost per trip or other reasonable basis for estimation. Such estimates and the resultant costs claimed must conform to the applicable Federal cost principals. Proposed travel should include funds for a yearly Program Review.

d. Materials & Supplies: Provide a list of the materials/equipment required to meet the technical approach as described in the WP and the estimated cost.

e. Sub-Agreements/Subcontracts: Provide a description of the work to be performed by the subrecipient/ subcontractor. For each PSA, a detailed cost proposal is required to be submitted by the subrecipient(s).

f. Recipient Acquired Equipment or Facilities: Equipment and/or facilities are normally furnished by the Recipient. If acquisition of equipment and/or facilities is proposed, a justification for the purchase of the items must be provided. Provide an itemized list of all equipment and/ or facilities costs and the basis for the estimate (e.g., quotes, prior purchases, catalog price lists). Allowable items normally would be limited to research equipment not already available for the project. General purpose equipment (i.e., equipment not used exclusively for research, scientific or other technical activities, such as personal computers, laptops, office equipment) should not be requested unless they will be used primarily or exclusively for the project. For computer/laptop purchases and other general purpose equipment, if proposed, include a statement indicating how each item of equipment will be integrated into the program or used as an integral part of the research effort.

g. Other Direct Costs (ODC): Provide an itemized list of all remaining proposed ODCs, such as Graduate Assistant tuition, laboratory fees, report and publication costs, and the basis for the estimate (e.g., quotes, prior purchases, catalog price lists).
h. **Indirect Costs:** Provide an estimate of the total indirect costs and provide data supporting how the estimate was calculated, including any estimated costs other than the labor and material equipment, i.e., overhead, G&A, etc.

You must provide a detailed budget justification for each year of the effort. You should clearly explain the need for each item. This section should include the budget, budget justification, copy of approved rate sheet, and any supporting documentation for the lead university and all sub-universities/PIs.

**Section VII: Milestone Payment Schedule**

The Milestone Payment Schedule shall include the payable events for the Prototype Project. Each event shall include a description and proposed price for the event.

**Section VIII: Affirmation of Business Status Certification**

Certifications for each participant shall be provided.

a. Name of Business Entity
b. Proposed NAICS Code
c. Cage Code
d. SAM Expiration Date
e. Address
f. Business POC Name, Title, Phone and Email

**Section IX: Data Rights Assertions**

Identify any intellectual property, patents and inventions in the proposed solution and associated restrictions on JHTO/the Government’s use of that intellectual property, patents and inventions. The following information shall be presented for all assertions:

a. Technical data, computer software, or patent to be furnished with restriction (If the assertion is applicable to items, components, or processes developed at private expense, identify both the data and each such item, component, or process).

b. Basis for assertion (Generally, the development of an item, component, or process at private expense, either exclusively or partially is the only basis for asserting restrictions on the Government's rights to use, release, or disclose Technical Data pertaining to such items, components, or processes. Indicate whether development was exclusively or partially at private expense. If development was not at private expense, enter the specific reason for asserting that the Government's rights should be restricted).

c. Asserted rights category (Enter asserted rights category (e.g., government purpose license rights from a prior contract, limited, or specifically negotiated licenses)).

d. Name of entity asserting restrictions (corporation, individual, or other person, as appropriate).

**Section X: Appendices**

**4.3 Evaluation of Proposals**

JHTO reserves the right to award all, some, or none of the PPPs submitted in whole or in part. JHTO may also request and recommend a directed partnership between two or more submitted PPPs, which may include all elements or selected elements of those PPPs. Should the JHTO choose to do this, it will provide direction that will enable the PPP leads, in conjunction with TEES, to pursue a PSA that will meet the
requirements of the SON. TEES and the JHTO will provide no funding for direct reimbursement of PPP development costs. Technical and cost proposals (or any other material) submitted in response to this RWP/RPP will not be returned.

If based on evaluation of a PPP, JHTO is interested in pursuing award, TEES will negotiate a PSA(s) with the selected UCAH consortium member.

PPPs will be evaluated against the stated criteria below:
1) Relevance of the proposed solution in addressing the SON;
2) Technical Merit and feasibility of the proposed solution to address the SON;
3) Proposed solution’s approach and/or underlying technology is unique, underutilized and/or innovative; and the approach and/or technology is a compelling solution to the SON;
4) UCAH consortium membership;
5) Student engagement (both graduate and undergraduate) in all phases of the proposed solution;
6) Proposed price;
7) Project schedule; and
8) Potential impact of data rights assertions.

PPPs will be evaluated on the basis of the merit of the proposed concept in addressing the SON and the factors above, not against any other PPPs held under the same SON. PPP submissions will be valid for 365 calendar days. Upon completion of evaluations, the government will notify the PPP lead that: (1) the proposed solution has been selected to pursue the award of a PSA; (2) the proposed solution is not of interest to the government; or (3) the proposed solution is of interest, but not eligible for a PSA due to availability of government resources.

If the proposed solution is of interest, but not eligible for a PSA due to availability of government resources, the PPP lead may be contacted within 365 calendar days from the PPP submission date with a request to refresh their PPP for the possibility of a PSA award. If after 365 calendar days from the PPP submission date (or earlier if notified by JHTO), government resources are not identified to formally move to a PSA award, the PPP lead will no longer be eligible for an award under this RPP.

4.4 Potential for Follow-On Production
In accordance with 10 U.S.C. § 4003(f), a Prototype Project issued under the overarching OT Agreement\(^2\), if successfully completed and competitively awarded, may result in the award of a follow-on production agreement without the use of competitive procedures. Success metrics for each PPP shall be defined in the individual Prototype Project and subsequent PSA(s).

Per DoD Policy, the following definition of “successfully completed” shall apply to any Prototype Project: ‘A transaction for a Prototype Project is complete upon the written determination of the appropriate approving official for the matter in question that efforts conducted under an OT-Prototype Project: (1) met the key technical goals of a project; (2) satisfied success metrics incorporated into the Prototype Project; or (3) accomplished a particularly favorable or unexpected result that justifies the transition to production. Furthermore, successful completion can occur prior to the conclusion of a Prototype Project to allow the

\(^2\) The Agreement under which the UCAH is established and managed by TEES.
Government to transition any aspect of the Prototype Project determined to provide utility into production while other aspects of the Prototype Project have yet to be completed.’

All Prototype Projects issued under the overarching OT Agreement shall set forth the conditions for successful completion in the statement of work.

The language of paragraphs 1 and 2 of this section shall be incorporated into all PSAs in order to allow for the option of non-competitive follow-on production contract(s).
